Download LockDown Browser

Welcome back! Hope you all have a good Easter break.

Many subjects will have online tests and quizzes in Canvas. You are required to use the LockDown Browser to take these assessment tasks. The LockDown Browser prevents you from printing, going to another URL, or accessing other applications during an assessment. You will also need to have a webcam for Respondus Monitor to work during an assessment.

Please take the following two steps so that you can participate in the online assessments - Please DO IT NOW (soonest possible):

Step 1: Download LockDown Browser https://download.respondus.com/lockdown/download.php?id=269556586 ₺ on your device

Step 2: Purchase a webcam if your device does not have a built-in webcam

Since it is advised for you to stay home in the current COVID-19 situation, you can explore online to purchase a web cam if you don't have one already. Please endeavour to get this sorted out as soon as possible. Should you have any issues, please let your tutor or subject coordinator know. I wish you all the best in your study. Thank you.

BUSINESS MATHEMATICS BMAT001

Course Description

Welcome to Business Mathematics!

Business Maths is designed to enhance students' ability to recognise and apply various mathematical techniques to solve problems in the changing business environment. This subject provides students with the opportunity to develop numerical and digital literacy skills in the context of business decision making. It is a practical subject drawing on technology based activities to explore the various mathematical underpinnings of business, laying the foundation for further business studies
