If you are enrolled in Academic English (ACEN001) in the first semester of your program, you must successfully complete the subject before progressing into further subjects.

[^]Based on successful completion of your diploma with no more than two subject failures.

Frequently asked questions from students on the Diploma of Business

1. Can I study Business if I am not good at maths?

Absolutely. Unless you are planning to go into some specific areas of business that require high level maths such as actuarial studies or advanced econometrics/ finance, you do not need to be advanced in maths to study business. General mathematics is usually enough for most business disciplines.

2. Is it difficult to find a job in Australia with a Business degree?

All industries need strong leaders, managers, financial advisors and market-savvy decision-makers. Traditional paths, including careers in the banking and financial sectors, consultancy, human resources and marketing roles, are also popular and appealing. Good business and management skills are key elements of any company, and there is strong demand for effective leaders, strategic thinkers and financial experts.

However big or small, companies all over the world are looking for graduates with business skills.

3. Is it difficult to get an internship if I study Business? What is the most common position for interns?

You'll need to engage with the content covered in the internship subject, participate in mentoring sessions, and attend career preparation workshops -

all of which are provided through the business and professional internship subjects at UTS. We find that students who engage and follow advice early in the session are the ones who find an internship the easiest, as well as an internship that is in line with their strengths and interests.

4. Do I get paid during an internship?

Internships can be either paid or unpaid, depending on what is available at the time. You're not limited to either type of internship, however, through the subject, you're permitted to work with only one organisation, either paid or unpaid. UTS also offers you the option to do a voluntary unpaid internship (not for course credit).

5. What is the career trend for Business in the coming years? What kind of jobs can I get?

This depends on your chosen discipline as well as personal interests. For example: there is a lot of work in marketing, and the trend is shifting more towards digital roles where experience in social media marketing is highly favourable. Trends change depending on the specific area of business you are interested in.
